

**Dear Customers,**

We would like to thank you for your constant support and interest in our products.

This time, we are launching the M-Chassis Pro Matched Springs set (under Atsushi Hara development supervision).

## Product Specifications:

The stiffness spring rate of any single spring can be slightly different even if all springs are made from the same wire rod with the same coil number.

In the "M-Chassis Pro Matched Springs set", each spring's stiffness rate has been individually measured and matched as a pair to provide the guaranty of a strictly identical stiffness rate value.

Atsushi Hara supervised the stiffness rate value.
