

Dear Customers,

**We would like to thank you for your constant support and interest in our products.**

**Today, Ride would like to introduce you a new tire related product.**

## Product Specifications:

### Pre-Mounted Tires Set for 1/10 Touring Car

- The product is a variation of the now famous Pre-mount tire set for 1/10 Touring Car with molded inner and wheel (No. 26006 to No. 26009) formally used for the Euro Touring Series.
- The variation consists of a recently developed closed-cell, lightweight type (LT) sponge inner suitable for carpet track or low-friction track surface.
- As usual, there are 4 types of tire compounds you can choose from according to track temperature and conditions. Even when the tires wear down, the grip level will remain consistent until they burst. Changing the tire set for each race is no longer necessary.
- As it is pre-mounted with item number stamped on wheels, the sponge inner cannot be changed, insuring equal condition for every racer.
- World champions, Hara Atsushi and Andy Moore, supervised the development of this product.
