

Dear Customers,
We would like to thank you for your constant support and interest in our products.

Ride would like to present the new 1/10 Touring Car with inner mesh High-Grip Tire.

Product Specifications:

Tire for 1/10 Touring Car

- The product is basically the tire used in the now famous Pre-mount tire set for 1/10 Touring Car with molded inner and wheel (No. 26006 to No. 26009) now sold separately.
- There are 4 types of tire compounds you can choose from according to track temperature and conditions. Even when the tires wear down, the grip level will remain consistent until they burst. There is no need to change for new tires at every race.
- World champions, Hara Atsushi and Andy Moore, supervised the development of this product.
- Now drivers can build the best suitable tire set with the wheels and inners of their choice.

No. 24012 - 1/10 Touring Car with inner mesh High-Grip Tire <Re36>
